 <small>©storymassage.co.uk</small>	This is a message story all about our Ocean topic.
 <small>©storymassage.co.uk</small>	Crabs are mysterious creatures. We learned about their habitat, diet, appearance, and their behaviour. We also learned fun facts.
 <small>©storymassage.co.uk</small>	Crabs use pinchers for protection and food. They have teeth in their stomach. They can grow back limbs. And they have lots and lots of babies!
 <small>©storymassage.co.uk</small>	The biggest crab is the Japanese spider crab. They can grow up to three metres.
 <small>©storymassage.co.uk</small>	We also made our own crabs using paper, paint, googly eyes and paper plates.
 <small>©storymassage.co.uk</small>	We learned that fish have lots of different fins for different reasons and that fish are vertebrates. There are different types of fish.
 <small>©storymassage.co.uk</small>	We used our learning about fish to make fish with tails and fins.
 <small>©storymassage.co.uk</small>	We also looked at the five oceans of the world. We looked at where they are and learned facts about them.
 <small>©storymassage.co.uk</small>	We also looked at pictures of plankton, videos of people surfing, videos of flying fish and various nature documentaries.
 <small>©storymassage.co.uk</small>	Our Oceans learning was amazing and fascinating.
